

Fork Lift Trucks - The Benefits:

- A safe, reliable and cost effective supply of clean LPG / BIOLPG available 24 hours a day complete with free inspection, maintenance and training.
- A complete refuelling solution contained in a tailor made modular 'skid' mounted unit giving excellent flexibility to suit all applications.
- Installation needs only hard standing and a single phase 220/240 volt supply.
- The cost of an onsite refilled 18KG 'self fill multi valve' cylinder is substantially less than one purchased pre filled from a supplier.
- Reduce your overall costs by as much as 50% using the bulk LPG / BIOLPG option.
- No wastage as you don't return any cylinders with unused gas in them.
- Less down time on your trucks as refueling takes only a couple of minutes.
- Fewer deliveries on site as your LP Gas storage is in bulk and needs only to be topped up once every 3 to 4 weeks. This is carried out automatically on our ever popular 'top-up' delivery service by experienced delivery personnel.
- No more unsightly stock piles of cylinders lying around the premises.
- Lifting of heavy cylinders is eliminated as the 16-18KG 'self fill multi valve' cylinders supplied stay mounted on the truck at all times. This means less chance of injury due to manual handling of cylinders being removed from the filling process.
